AI-POWERED BRAND PROTECTION

Find fake sites before your customers do.

AI-powered web monitoring that scans for lookalike domains, phishing sites, and brand impersonators 24/7. Detect threats in minutes—not weeks—and convert them to takedowns with one click.

4 min

AVERAGE DETECTION

Find lookalike domains minutes after registration.

Not weeks later, when customers start complaining.

24/7 Web Monitoring

AI continuously scans for domains, sites, and social profiles targeting your brand.

Instant Detection

New threats surfaced within minutes of creation—before they reach customers.

One-Click Takedown

Convert any detection into a takedown case with auto-collected evidence.

Sentrike

How detection works.

From brand onboarding to threat detection in minutes.

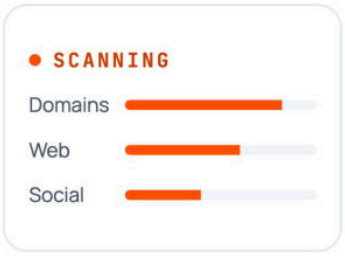

00 ONBOARDING

Enter your website URL. That's it.

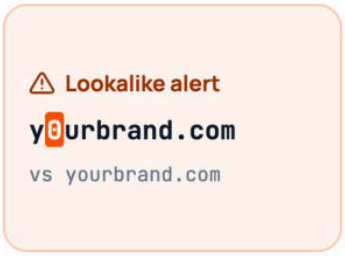

01 SCANNING

AI extracts brand identity and begins 24/7 monitoring.

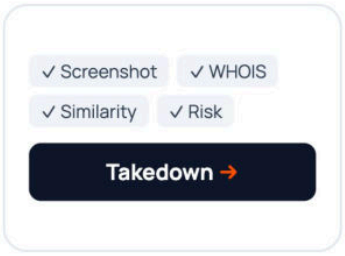

02 DETECTED

New lookalike domain found minutes after registration.

03 ACTIONABLE

Verified with auto-collected evidence. One-click takedown.

LOOKALIKES

yourbrand.com
yourbrand-login.com
secure-yourbrand.net

PHISHING

Fake login pages
Credential harvest
Payment fraud

IMPERSONATION

Fraudulent social profiles

INTEGRATIONS

API access

Connect detections to your own tools and workflows.

DETECTION → TAKEDOWN

Proactive in minutes, not reactive in weeks.

	MANUAL — Weeks → Days	SENTRIKE — Hours → Minutes
Discovery	Google searches, hope for the best	AI finds threats automatically
Verification	Manual review, screenshot tools	Auto-verified with evidence
Takedown	Draft emails, track responses	One click, fully automated
Monitoring	Check back manually	Tracked until removed

Stop discovering threats after the damage is done.

Find lookalike domains and phishing sites before your customers fall victim—and turn them into takedowns with one click.
