MARKETPLACES AND APP STORES

Every place your products could be faked.

From Amazon and Walmart to AliExpress, TikTok Shop and the App Store, watched from one place.

Counterfeit listings

Listings that use your brand and product names at prices that don't add up.

Fake apps

Apps in Google Play and the App Store that pose as your official app.

Unauthorized sellers

Sellers who aren't on your list, and the shops behind several fakes at once.

How Product Monitoring works.

From your catalog to every listing, in three steps.

01 ADD YOUR PRODUCTS

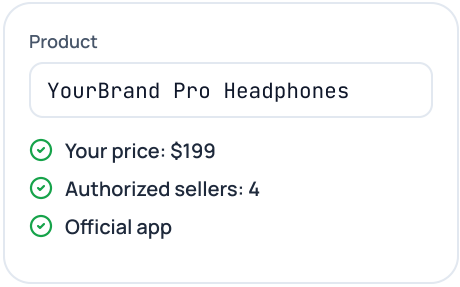

Product names, prices and the sellers you authorize.

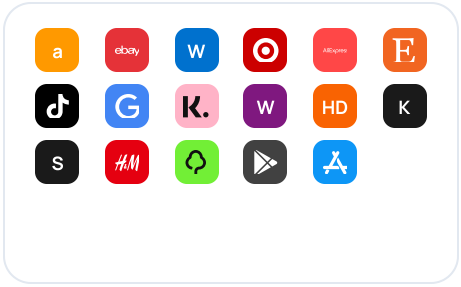

02 SEARCH EVERY LISTING

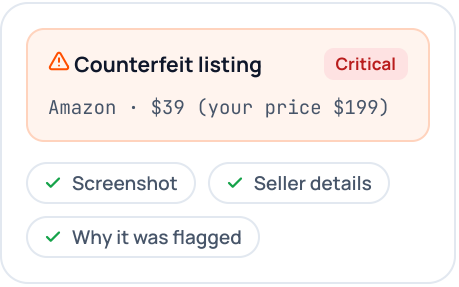

Marketplaces, shopping search and app stores are checked around the clock.

03 SEE WHAT'S FAKE

Prices too good to be true and unknown sellers are scored and sent with the evidence.

WHAT SENTRIKE FINDS

Counterfeit listings
Products sold under your brand that you didn't make.

Suspicious prices
Listings priced far below what you charge.

Unauthorized sellers
Sellers who aren't on your list of resellers.

Fake brand stores
Store pages that pose as your official shop.

Fake apps
Apps that pose as yours in Google Play and the App Store.

Fake shops on social
TikTok Shop listings and shops using your name.

GOOD TO KNOW

No access to your marketplace accounts: Sentrike needs your product names, prices and authorized sellers.

Listings and apps are documented, with the reasons they were flagged, for your team to report to each marketplace. Sentrike doesn't remove listings.

If a listing leads to a fake shop website, Sentrike Takedown gets that site removed.
