AI-POWERED TAKEDOWNS

# Autonomous takedowns in minutes, not days.

Stop waiting days for manual abuse desk emails. Sentrike automatically detects, verifies, and neutralizes phishing sites, lookalike domains, and brand impersonators in real time.

**1,200%+**

**Rise in malicious phishing emails in the 12 months after ChatGPT launched.**

Attackers use AI. Now you can too.

### Instant Reporting

Abuse reports to registrars, hosts & browsers in minutes.

### Browser Flagging

Google Safe Browsing warnings protect customers before takedown.

### Continuous Monitoring

Every threat watched until it's fully removed.

Sentrike

# How a takedown happens.

One threat. One automated pipeline, inside the product.

DETECTION → VERIFIED REMOVAL

**00 REPORTED** → **01 AI TRIAGE** → **02 ENFORCED** → **03 LIVE TRACKING**

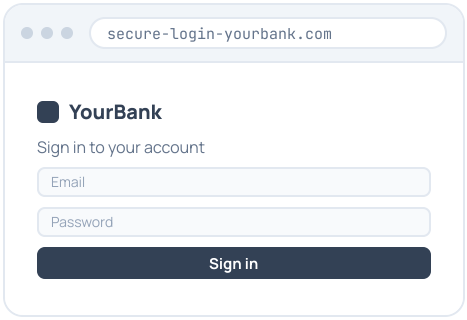

A phishing report enters the system.

Severity and intent classified in minutes.

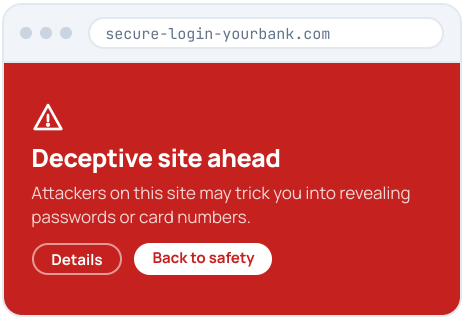

Users protected in minutes.

Monitored until the content is gone.

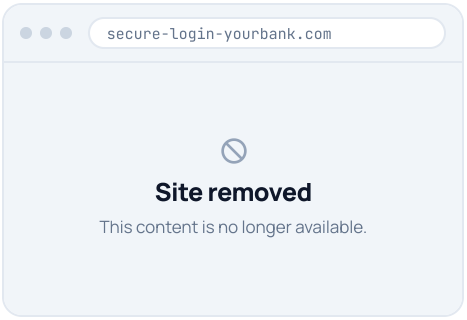

FAKE SITE

FLAGGED BY BROWSERS

REMOVED

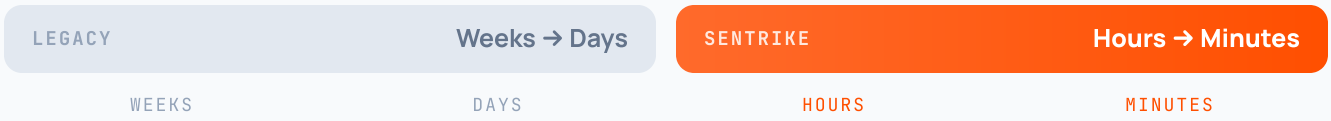

**EVIDENCE LOG.** Every step auditable. 09:14:22 DETECTED → 11:32:54 TAKEDOWN

✓ THREAT NEUTRALIZED

## SPEED MATTERS

From detection to takedown in hours, not weeks.

- Minutes to flag in Google Safe Browsing.
- Hours for a full takedown, not days or weeks.

## WHAT WE HANDLE

- Phishing sites
- Brand impersonation
- Fake login pages
- Fraudulent domains

## WHERE WE FILE

- Domain registrars
- Hosting providers
- Browser safety programs

# Stop chasing takedowns.

Let your team focus on real threats while Sentrike's agents detect, report, and eliminate the impersonators, autonomously, around the clock.
