SOCIAL PLATFORMS, PLUS SEARCH AND DOMAINS

Everywhere they could be faked.

Google Search and Google News, link-in-bio pages like Linktree, and every new domain registered with their name.

Fake profiles

Every profile is compared with your executives' official ones, showing what was copied: the name, the title, the bio, the handle.

Scams in their name

Fake investment offers, crypto schemes and giveaways that use a leader's name to look credible, caught before they spread.

Fake recruiters

Fake job offers and messages sent in an executive's name to get data or money from candidates and partners.
